

## CASE STUDY

Client: Severn Valley Railway

Project: Scotsman

Details: Observation Walkway

When a distinguished gentleman comes to town after a 4.2 million pound body workout, everybody wants to see the finished results

Premier Rail Services were awarded the contract from Severn Valley Railway. The work was to construct a timber crossing & viewing walkway that was of heritage construction which was also compliant with modern health and safety standards. And that would fit in with its surroundings, and be ready for the big day. Bewdley started its life in the beginning of the fourteenth century and its name is derived from “beau lieu” meaning beautiful place. A beautiful place for a beautiful Loco.

“Not since the invasion of the Saxons, had Bewdley been invaded in such numbers”
